

## CREDIT SERVICES

# Rapid ReCheck

### Expedited bureau-level updates

Rapid ReCheck, an innovative service offered by CoreLogic® Credco®, speeds up the bureau-level update process. Rapid ReCheck provides fast updating of national repository records – and an updated FICO score – so you can respond faster with the right loan products for your clients.

#### Fast, Bureau Level Updates

When you obtain your client's original source documentation from the credit grantor, simply forward it to Credco for validation by our credit specialists. Once validated, it will be forwarded to the appropriate credit bureau(s) and processed within three to five business days.

#### Score Updates

When the update request has been completed, your client's credit report will be re-pulled for verification. The new file can then be forwarded directly to you, or accessed conveniently online 24/7.

Rapid ReCheck will result in a recalculated FICO® score. The score will reflect all of the updated information in the bureau's file.

#### Score Factors

Our Instant Merge® summary page includes four score factor codes – provided in order of importance – that can be used to evaluate possible rescoring opportunities. The information can be used when ordering a Rapid ReCheck to get the best results for your client.

For more information on Rapid ReCheck, contact a CoreLogic Credco sales associate at (800) 255-0792 or visit us online at [www.credco.com](http://www.credco.com).

### PRODUCT HIGHLIGHTS
